

Git Kata

Instructions

1. Create a branch - all names are acceptable!
2. Make a change (anything)
3. Stage the change (add).
4. Commit your change with a sensible commit message.
5. Push the change.
6. Create a PR and wait until you have two approvals.
7. Merge the branch.
8. Delete the branch on the remote repository.
9. Checkout master on you machine.
10. Delete the branch on your machine.
